

# Sun Drenched ~ Super Foods

Australia's best kept secret has sustained the world's longest continuing living culture, the Australian Aboriginals for over 50,000 years. These prehistoric plants still growing abundantly in Australia's wild Outback are of such complexity and concentration they almost defy belief.

Recent Scientific discovery of Kakadu plum, lists it as the world's richest source of vitamin C per gram than any other fruit, it has been further complemented by Pepperberry as the world's most powerful antioxidant food.

Five of Australia's most potent native plants are complemented by a selection of world plant-foods in **Kakadu Juice**, a masterfully blended, lusciously rich, full-bodied liquid banquet boasting an exciting spicy-chocolate taste your body will love.

This cocktail of essential nutrients supplies an abundance of slow-release energy, vitamins, minerals, antioxidants, enzymes, bioflavonoids, chlorophyll, protein, essential fatty acids (3, 6, & 9) and fibre for fortifying the diet the way nature intended ~ from cold-processed whole foods.

## kakadu plum

Holds the World Record for Vitamin C content. Is a *phytonutrient feast* full of antioxidants, folic acid and iron. A favourite health food of Australia's Aboriginal people.

## pepperberry

Hailed as the World's strongest antioxidant food and traditionally used as a bush medicine by Australia's Aboriginal people.

## quandong

Has a sweet peach flavour used in gourmet cuisine. Contains vitamins, minerals & unique oils.

## illawarra plum

A very close rival to the pepperberry for the title of strongest antioxidant. Subtle plum/pine flavours plus vitamin C make it a culinary favourite and bonus for Kakadu Juice!

## wild rosella

A tasty bush flower used in jams and sauces. A truly rich antioxidant food with incredibly high levels of the 2 most active anthocyanins.

## goji

A natural cornucopia of nourishing vitamins including A, C, E & B, antioxidants, amino acids, essential oils, anti-inflammatories and proteoglycans.

## acai

A feast of flavonoids, omega 3, 6 & 9 oils, vitamins & sterols. A health-food favourite of the native South Americans with a taste like chocolate cherries!

## mangosteen

A delicious fruit full of polysaccharides, anti-inflammatories, vitamins and minerals plus over 40 different highly concentrated antioxidant Xanthenes.

## blueberry

A well known health-food full of flavour, fibre, phenols, vitamin C and potent antioxidants including resveratrol and numerous bio-flavonoids.

## pomegranate

Juicy and sweet with an abundance of anti-inflammatories and many antioxidant bioflavonoids including elagic acid.

## green tea

A powerful herb, famous for its copious catechins, vitamins and minerals plus ECGC (an even stronger antioxidant than vitamins E & C)

## flax seed

A wonderful source of omega 3, 6 & 9 oil, lignans (numerous health benefits and rich in healthy plant proteins important for a naturally nutritious diet.

## barley grass

A concentrated green food rich in enzymes, proteins, antioxidants, vitamins, minerals and chlorophyll which may be lacking in modern processed food diets.

## grape seed

Grape seeds contain numerous fatty acids and antioxidants including resveratrol and the OPC's which are strong & versatile antioxidants.

## cherry

Delightfully sweet, slightly sour with antioxidant power! Also a source of mallic acid and numerous bioflavonoids.

## herbal active

A proprietary blend of herbal extracts from Australian native plants with anti microbial and anti fungal properties.

Over one hundred Aboriginal families and communities are currently involved with harvest and gathering of these raw native ingredients which economically supports the preservation and appreciation of Australian Aboriginal culture.

# Kakadu Juice Fact Sheet

A New breakthrough Australian product containing Native Bush Foods that could make many nutritional supplements obsolete!

## Super Foods

'From some of the world's harshest landscapes ~ comes the world's most nutritious plant foods'

Scientists are discovering that Native Australian Bush Foods are more nutrient dense than Goji Berries\* and contain over 200% the level of antioxidants than Blueberries.\*\*

Australia's unique wild plant foods have sustained the world's longest living culture ~ the Australian Aborigines for thousands of years. The health benefits of these fruits, herbs and spices are gaining global attention as emerging research reveals record levels of natural Vitamins, Antioxidants and unique Phytonutrients.

Now, after many years of research, testing and development, these newly recognised, world-leading Australian food plants are blended with exotic foods from around the world. This has resulted in an exquisite nutrient dense SUPER BEVERAGE for your enjoyment.

Kakadu Plum is one of five of Australia's most potent Natives selected for careful wild-harvesting, cold-processing and smooth blending to maintain maximum nutrient content in Australia's very own super-food beverage, **Kakadu Juice**.

Enjoying a serving or two of **Kakadu Juice** daily is the sensible and affordable way to good health and something that Australians of every age have fallen in love with. Some simply enjoy knowing they are getting their vitamins, minerals and antioxidants from real plants while many others are reporting health breakthroughs previously unattainable with other products.

### Vic Cherikoff ~ Scientist ~ Author ~ Co-formulator of Kakadu Juice

"I have spent over 25 years studying the ancient plant lore and traditional wisdom of the Australian Aborigines and recognise that theirs is the longest living culture on the planet... It is a dream come true to bring the miraculous superfoods of Australia to the world. I believe that **Kakadu Juice** will have more powerful benefits on health, well-being and anti-aging than any other product on the market. After all, it has been 40,000 years in the making".

### James H. Qld

"I own a large Wellness Centre with many therapists and have seen every new health product in the last 15 years. **Kakadu Juice** is without doubt the best quality whole food health product I've ever seen. It's exactly what I was wanting to offer our patients. A great Australian product, I take it every day."

### David M - QLD

One of the immediate benefits I noticed has been my energy level, I've lost weight over the last couple of months and exercising more now and sleeping less, that is just some of the benefits I've experienced with **Kakadu Juice**.

President ~ Kakadu International  
Formulator ~ Kakadu Juice  
Helicopter Pilot

Creating a Super-Food beverage from Australian Native plants has been a desire of mine for a number of years. Research has shown that many of these Native plants are nutritional World Record holders.

Over the years, I have learned from the Indigenous people I visit on my voyages. I have also observed other Australian scientists make exciting discoveries about the value of our Native plants.

So, in collaboration with Vic Cherikoff set about planning a food beverage to contain these very same fruits, which contain optimal amounts of antioxidants, vitamins and minerals. **Kakadu Juice is that product.**

Having over 25 years experience in formulating health products I am certain that **Kakadu Juice** will become very popular, I hope you like it as much as I do.

Kakadu Juice is a high-quality product

We offer a 30-day money back guarantee

made in Australia  
from local & imported ingredients

Kakadu International supports the preservation and appreciation of Australian Aboriginal culture.
